

NAVYASHREE

Aspiring Software Engineer

+91 6362623670 • navyashree2317@gmail.com • [LinkedIn](#) • [GitHub](#) • Bengaluru, India

SUMMARY

Aspiring Software Engineer with a strong foundation in Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems and Computer Networks. Proficient in C, Java, Python, JavaScript, React.js, Node.js, MySQL and MongoDB, with experience in building full-stack web applications and RESTful APIs. Passionate about solving complex software engineering problems by designing scalable, high-performance applications using strong computer science fundamentals, object-oriented programming, and modern software development practices.

EDUCATION

Dr. Ambedkar Institute of Technology	Bengaluru, Karnataka
Bachelors in Computer Science and Engineering CGPA: 8.57 / 10	2022 - 2026
Brigade PU College	Hassan, Karnataka
Pre -University (State Board of Karnataka) 93.66%	2020 - 2022
St. Philomena's Girls High School	Hassan, Karnataka
Class 10 (State Board of Karnataka) 95.84%	2017 - 2020

SKILLS & INTERESTS

Programming	: Java · Python · C · JavaScript · Object-Oriented Programming · Data Structures & Algorithms
Backend & APIs	: Node.js · REST APIs · MySQL · MongoDB · DBMS · JWT Authentication
Frontend	: React.js · HTML5 · CSS3
Software Engineering	: SDLC · System Design Fundamentals · Software Debugging · Git · GitHub

WORK EXPERIENCE

Full Stack Developer Intern, MentxTV	05/2025 - 12/2025
--------------------------------------	-------------------

Developed a full-stack web portal using React, TypeScript, Tailwind CSS, Node.js, and MongoDB for managing news content through responsive frontend interfaces, integrating frontend components with backend REST APIs. Implemented role-based authentication and authorization with JWT to enable secure post creation, editing, and deletion for admins and authors. Built a responsive user interface with protected routes, category-based search functionality, and integrated Cloudinary image uploads using Multer. Developed clean, maintainable, and scalable software while debugging issues, optimizing application performance, and collaborating with the team to deliver high-quality features following software engineering best practices.

Android App Development using Gen AI Intern, MindMatrix	02/2026 - 05/2026
---	-------------------

Developed and tested Android application features using Kotlin while leveraging Generative AI tools for coding assistance, debugging, testing, and implementation. Independently designed, tested, debugged, and documented application features while resolving software issues and delivering reliable, high-quality functionality.

PROJECTS

Streamline News Platform | MERN Stack · TypeScript · Tailwind CSS · JWT

Developed a full-stack news management portal using React, TypeScript, Tailwind CSS, Node.js, Express.js, and MongoDB, providing an intuitive web frontend for content management. Designed and implemented secure, scalable admin and author dashboards with JWT authentication while integrating REST APIs and building reusable frontend components.

Online Car Rental Management System | HTML · CSS · JavaScript · MySQL

Developed a responsive car rental management portal using HTML, CSS, JavaScript, and MySQL with booking, customer management, and vehicle availability dashboards. Implemented CRUD functionality for vehicle booking, customer management, and availability tracking while ensuring efficient database management. Designed a responsive and user-friendly interface. Optimized database queries to improve application performance, scalability, and responsiveness.

PARTICIPATIONS AND CERTIFICATIONS

- DSA using Java – NPTEL (2025) | DBMS – NPTEL (2025).
- Participated in Hack Colossus 2.0, a national-level hackathon at Dr. Ambedkar Institute of Technology.
